

SEE-IT assessment form

Assessment instructions

1. **Choose** if you want to assess a full colour or greyscale version of the artwork
2. **Mount** the artwork **on a wall** or a shelf at eye-level.
3. **Lay a tape measure** out on the floor, so that the metal end is touching the wall. Press the button to lock the tape measure off.
4. **If you wore any glasses** for the calibration, wear the same ones for this assessment.
5. **Determine** which particular feature on the artwork you want to assess, e.g. a particular piece of text or graphics.
6. **Choose** if you want to assess reading, recognising or distinguishing.
7. **Walk** backwards and forwards until you find the furthest distance at which you can read/recognise/distinguish this feature quickly and with certainty.
8. **Record** below the position of your big toe on the tape measure (in cm). This is your **Assessment Distance**.
9. **Calculate** the corresponding exclusion and colour band using the SEE-IT tool.

Insert a picture of your artwork, or describe it here:

Assessor 1	Assessor 2
Name :	Name:
Calibration distance (cm):	Calibration distance (cm):

Feature being assessed	Did you read, recognise or distinguish?	What makes this feature difficult to see?	Assessment distance (cm)	Exclusion (%) (Colour band)	Assessment distance (cm)	Exclusion (%) (Colour band)

How could the design be improved?
